

Prajwal Mhaske

FullStack Developer

prajwalmhaske4438@gmail.com | 9699880215 | Pune | linkedin.com/in/prajwalmhaske2003

SUMMARY

Java Full Stack Developer with 2+ years of experience in building scalable web applications using **Java, Spring Boot, and React**. Strong expertise in **REST API** development, frontend-backend integration, and database management. Hands-on experience with modern **JavaScript (ES6+)**, **JDBC**, and responsive UI development. Familiar with Agile methodology, **Git** version control, and application performance optimization.

PROFESSIONAL EXPERIENCE

Web Minds It Solution, *Java FullStack developer*

03/2025 | Pune

- Developed and maintained scalable full-stack applications using **React.js** and **Spring Boot**
- Designed and implemented **RESTful APIs** for user management, **authentication**, and data handling
- Integrated frontend and backend systems ensuring seamless API communication
- Performed **CRUD** operations using **JDBC** with **MySQL/PostgreSQL** databases
- Used **Git** for version control and collaborated in Agile development environment
- Debugged, tested, and optimized application performance

EDUCATION

BBA(Computer Application), *Savitribai Phule Pune University*

Pune

SKILLS

Frontend: HTML, CSS, JavaScript, React

Backend: Java, Spring Core, Spring MVC, Spring Boot, Spring REST

Database: JDBC (MySQL/PostgreSQL)

Tools: Git, GitHub, Postman, Maven, Figma

Core Concepts: Collection Framework, REST APIs, OOPs

PROJECTS

1. Learning Management System (LMS), (Similar to Udemy – Course Selling & Learning Platform)

- Developed a full-stack Learning Management System enabling users to browse, purchase, and access online courses
- Built responsive user interfaces using **React** for course listing, video streaming, and user dashboard
- Designed and developed **RESTful APIs** using **Spring Boot** for course management, user authentication, and enrollment
- Implemented backend logic for course creation, content management, and progress tracking
- Integrated database operations using **JDBC** for storing user data, course details, and transactions
- Collaborated with **cross-functional** teams and followed **Git-based** version control

2. Rushing To Your Need (R2YN), (Food Delivery Platform – Similar to Zomato/Domino's)

- Developed a scalable food delivery web application allowing users to browse restaurants and order food online
- Created dynamic and responsive frontend using React for menu display, cart, and order tracking
- Built **REST APIs** using **Spring Boot** for order management, user handling, and **payment flow integration**
- Implemented core features such as add-to-cart, order placement, and order status updates
- Managed database interactions using **JDBC** for storing user orders, restaurant data, and transactions
- Optimized application performance and handled **bug fixing** to improve user experience
